#### Traction in brief

Traction is an investment company with active ownership interest in listed and unlisted small- and medium-sized companies. Traction is also engaged in investment activities for the purpose of obtaining a good yield on the Company's capital through financial investments, mainly in other listed companies and interest-bearing assets. Traction's role as owner is based on an active and long-term engagement in close co-operation with other active owners, entrepreneurs and corporate management groups. Traction does not focus on singular industries. Traction instead is engaged in development and transformation work applicable to all companies intending to prioritize business sense, a long-term approach and sound business principles. Traction's shares are traded on NASDAQ Stockholm (the Mid Cap list). More information is available at [www.traction.se](http://www.traction.se).

## President's statement

The global financial markets suffered weak development during the fourth quarter, with declining stock prices and growing risk aversion in general. Prices on the Stockholm Stock Exchange fell during the last quarter of the year by 14.1 percent, and by 4.6 percent for the full year 2018. The overall weak development also affected most of Traction's listed holdings negatively, and stable gains during the first three quarters were eroded, generating a deficit for the active listed holdings, as well as other listed holdings, resulting in a deficit for the full year 2018.

Traction's net asset value declined by 3 percent during 2018, with the active listed holdings losing 5 percent in 2018, and active listed holdings shedding 5 percent of their value, and other listed holdings losing approximately 3 percent, while interest-bearing investments fared reasonably well. In addition, unlisted holdings as a group had a negative effect on the net asset value due to a revaluation of Ankarsrum Industries by MSEK 29. Overall, the year's result amounted to MSEK -71, which is weak, although it may still be appropriate to recall that the profit for the two preceding years was in excess of MSEK 700.

Most of last year's losses were recovered during the first quarter of 2019, with an increase in active listed holdings, other listed holdings and interest-bearing investments with 100 MSEK, based on 13 February closing prices.

A change in the share prices of our listed holdings does not always necessarily reflect the actual development in the companies as such. One example hereof is BE Group, whose share price swooned by 28 percent during 2018, a year when the underlying gain for the operations was 42 percent and profit before taxes grew by 132 percent to MSEK 132. It is gratifying that the business, after several years of extensive

restructuring efforts, shows distinctly improved profitability.

We don't know a whole lot about the future, but it is evident that 2019 will be an exciting but challenging year. Some slowdown in the world economy is likely, but the question is to what extent? Uncertainty surrounding the interest rate policy of central banks, primarily the U.S. Federal Reserve, higher tariffs affecting world trade, Brexit or not, how and when? Also, for example, structural changes in many industries affecting customer behaviour, rules and regulations.

Then there is also the question of how the Swedish central bank will react in an environment with a weakening economy and falling home prices. So far, the Riksbank's policy, with support from a passive government failing to take the opportunity to improve the taxation treatment of borrowers versus savers and other regulations surrounding housing construction, has resulted in unnecessary real estate bubbles, also creating artificially high domestic consumption and a doped export industry thanks to lower exchange rates.

Let us hope that the central bank comes to its senses and at least adapts the interest rate level, regardless of the state of the economy, real estate prices and, particularly, their obsolete inflation calculation model. Nor can a responsible central bank relegate to the politicians to create or alter the regulatory environment that mitigates the consequences of their own highly dubious and risky interest rate policy.

Unfortunately (or perhaps for the better of Traction's holdings) it is probably more likely that an obstinate central bank continues to support asset inflation, favour export companies and their shareholders, while at the same time weakening the Swedish krona further, all to actively participating in, and being responsible for, the likelihood of an impending crash having even more dire consequences.

<sup>1</sup> Short-term interest-bearing investments are defined as investments in commercial paper and similar instruments with a maturity of less than one year.

## Transactions with closely related parties

Beyond the dividend to the Parent Company's shareholders decided at the Annual General Meeting, there have been no transactions between Traction and closely related parties that have significantly affected the Group's and the Parent Company's financial position during the period beyond the dividend to the Parent Company's shareholders as decided by the Annual General Meeting.

There were the usual transactions between wholly and majority owned companies in the Traction Group, including loans, interest charges, repayments and some charges for services provided and payment of director's fees in as decided by the Annual General Meeting.

## Risks and uncertainty factors

Traction's significant risk and uncertainty factors include business risks in the form of exposure to certain industries, or an individual holding, as well as dependency on individual key persons in the Companies in which Traction is involved or has an ownership interest.

In addition, there are financial risks, which primarily consist of price risks, i.e. the risk of a change in value of a financial instrument due to changes in share prices, foreign exchange rates or interest rates. In addition to the risks described in Traction's Annual Report in general by reason of the Company's business orientation, specific reference can be made to the Report of the Board of Directors and accompanying notes for a more detailed discussion of the Group's and the Parent Company's risk exposure and risk management procedures. Beyond that, no additional significant risks are deemed to have been added.

## Valuation of financial instruments at level 3

Valuation of unlisted holdings is made based on *International Private Equity and Venture Capital Valuation Guidelines* as developed and published jointly by risk capital organisations EVCA, BVCA and AFIC. For directly owned investments, an overall assessment is made to determine which valuation method is appropriate for each individual holding. Taken into account will be whether any financing or transaction “at arms-length distance” has been made and an evaluation is also made by applying relevant multiples to the company’s key financial indicators from a selected group of similar companies, less an adjustment for, for instance, difference in size between the company in question and the group of comparable companies. In cases where there are other methods that better reflect the fair value of an individual holding, such methods are used which means that individual holdings may be value by other than the methods described above.

All level 3 assets consist of shares in unlisted companies and are valued in accordance with the following valuation methods and non-observable data used for determining the carrying value. The data in the table below represent a selection and is therefore not all input data used in the valuation.

EBIT multiples: 5 - 9

Revenue multiples: 0.5 - 3.0

Net asset valuation: Established net asset value

Most recent transaction: In the case of recently floated new issue/share offering, the price thereon is taken into account. Higher multiples may also be applied in cases of expected rapid growth.

## Definitions and alternative key financial indicators

The definitions and alternative key financial indicators below are significant for the understanding of Traction's operations. Only earnings per share below is defined in accordance with IFRS.

### The Traction Group

Aside from the AB Traction parent company, the Traction Group includes wholly owned subsidiaries managing securities, providing lending, underwriting and consultancy services, mainly to Traction's project companies.

### Financial investments

Refers to investments in shares and interest-bearing financial instruments where Traction's ownership is less than 10 percent of the votes, or where Traction does not have an active role by being represented on the Board of Directors. Financial investments are shown in the listing of Traction's net asset value, and in the consolidated and Parent Company balance sheets in this report. A previously active listed holding is recognized as a financial investment on the day when ownership falls below 10 percent of the votes, or from the day when Traction's representative leaves the Board of Directors.

### Listed active holdings

Holdings in listed companies where Traction's ownership exceeds 10 percent of the votes, or where Traction has an active role by being represented on the Board of Directors. Active holdings are shown in the listing of Traction's net asset value in this report. A holding is recognized as from the day when Traction's ownership exceeds 10 percent of the votes, or from the day when Traction is represented on the Board of Directors.

### Unlisted active holdings

Wholly and partially owned unlisted companies where any remaining shares typically are held by one or more entrepreneurs or other active owners. Unlisted holdings are companies whose shares typically are owned by one or more entrepreneurs or other active part owners. Unlisted holdings are companies whose shares are not subject to organized daily trading, but not necessarily on a regulated market. Upon listing of an unlisted holding, or upon delisting of a listed company, the holding switches category on the day when the change occurs.

### Dividend yield

Dividend in percent of market price at year-end. The proposed dividend of SEK 3.60 per share represents a dividend yield of 2.18 percent, i.e.  $3.60 \div 165 \times 100$ .

### Equity per share/net asset value per share

Equity at the end of the period, divided by the number of shares outstanding on the same day, i.e.  $2,638.4 \times 1,000,000 \div 14,789,847 = \text{SEK } 178$ .

### Net asset value discount

Traction's market value, where unlisted class A shares are given the same value as the listed class B shares at the end of the period, less the net asset value divided by the net asset value at the end of the period in percent, i.e.  $(178 - 165) \div 178 \times 100 = 7.3\%$

### Net asset value/equity

The net of assets and liabilities at market value, which in Traction's case is equivalent to the Traction Group's equity, i.e. MSEK 2,638 as of 31 December 2018.

---

**Change of net asset value per share, adjusted for dividend paid in percent / Return on equity on net asset value per share**

Earnings per share, divided by opening equity per share after deduction of dividend paid per share during the period in percent, i.e. for 2018:  $-4.83 \div (186 - 2.75) \times 100 = -2.6\%$ .

**Earnings per share**

Result for the period after dilution, divided by the average number of shares outstanding during the period, i.e. for 2108:  $-71.4 \times 1,000,000 \div 14\,789\,847 = \text{SEK } 4.83$ . The number of shares outstanding was unchanged during 2018.
