President's statement

Traction's net asset value increased by 7 percent during the first nine months of the year, which in the current financial climate is acceptable, though not remarkable. But a cursory analysis reveals that Traction's active holdings generated a return of 19 percent and other listed equities as much as 27 percent. Traction has long held a significant proportion of interest-bearing investments, cash and cash equivalents of more than 40 percent, which means that it is challenging to generate a similar returns on these holdings, nor is that our ambition, as liquidity and risk-taking are just as, or more important parameters.

After the end of the period under review, world-wide financial turbulence has resulted in stock market losses affecting Traction's listed holdings negatively by approximately MSEK 93. It is highly likely that continued market weakness will negatively affect most of our existing holdings. At the same time unrest and turbulence create interesting possibilities for Traction to identify new business opportunities, which in an extended perspective may generate positive contributions to Traction's performance.

Risks and uncertainty factors

Traction's significant risk and uncertainty factors include business risks in the form of exposure to certain industries, or an individual holding, as well as dependency on individual key persons in the Companies in which Traction is involved or has an ownership interest.

In addition there are financial risks, which primarily consist of price risks, i.e. the risk of a change in value of a financial instrument due to changes in share prices, foreign exchange rates or interest rates. In addition to the risks described in Traction's Annual Report in general by reason of the Company's business orientation, specific reference can be made to the Report of the Board of Directors and accompanying notes for a more detailed discussion of the Group's and the Parent Company's risk exposure and risk management procedures. Beyond that, no additional significant risks are deemed to have been added.

The Group's financial assets will continue to be recognised applying "fair value option", in accordance with IFRS 9.

On January 1, 2019, IFRS 16 comes into force. This standard specifies how rental and leasing contracts are recognised, measured and presented by lessors and lessees.

The new standard will not lead to any significant changes in the Group's accounting.

Valuation of financial instruments at level 3

Valuation of unlisted holdings is made on the basis of *International Private Equity and Venture Capital Valuation Guidelines* as developed and published jointly by risk capital organisations EVCA, BVCA and AFIC. For directly owned investments, an overall assessment is made to determine which valuation method is appropriate for each individual holding. Taken into account will be whether any financing or transaction “at arms-length distance” has been made and an evaluation is also made by applying relevant multiples to the company’s key financial indicators from a selected group of similar companies, less an adjustment for, for instance, difference in size between the company in question and the group of comparable companies. In cases where there are other methods that better reflect the fair value of an individual holding, such methods are used which means that individual holdings may be value by other than the methods described above.

All level 3 assets consist of shares in unlisted companies and are valued in accordance with the following valuation methods and non-observable data used for determining the carrying value. The data in the table below represent a selection and is therefore not all input data used in the valuation.

EBIT multiples: 5 - 9

Revenue multiples: 0.5 - 3.0

Net asset valuation: Established net asset value

Most recent transaction: In the case of recently floated new issue/share offering, the price thereon is taken into account. Higher multiples may also be applied in cases of expected rapid growth.

Review Report

To the Board of Directors of AB Traction (publ), corporate ID number 556029-8654

Introduction

We have reviewed the summary financial interim information (Interim Report) of AB Traction (publ) as of 30 September 2018 and the nine-month period ending on that date. The Board of Directors and the President is responsible for the preparation and fair presentation of this Interim Report in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this Interim Report based on our review.

Scope of the review

We have conducted our review in accordance with International Standard on Review Engagements ISRE 2410 *Review of Interim Financial Information by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. The conclusion expressed based on our review does therefore not have the certainty that a conclusion expressed based on an audit has.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe the Interim Report in all material respects is not prepared for the group in accordance with IAS 34 and the Swedish Annual Accounts Act and for the parent company in accordance with the Swedish Annual Accounts Act.
